FUEL PROCESSING TECHNOLOGY

Contents Vol. 44

Special Issue: Ash Chemistry in Fossil Fuel Processes

Preface vii

Overview

Status of coal ash behavior research
S.A. Benson, E.A. Sondreal and J.P. Hurley (Grand Forks, ND, USA) 1

Fossil Fuels and Ash Characterization

Thermal analysis of coal under conditions of rapid heating
H.B. Kwon (Masan, South Korea) and F.J. Vastola (University Park, PA, USA) 13

Investigation of the reactivity of macerals using thermal analysis
R.W. Bryers (Livingston, NJ, USA) 25

Pyrite and illite associations in two eastern US bituminous coals
P.N. Slater, G.H. Richards and J.N. Harb (Provo, UT, USA) 55

Size-related variations in coal fly ash composition as determined using automated scanning electron microscopy
K.A. Katrinak and C.J. Zygarlicke (Grand Forks, ND, USA) 71

Chemical composition and size distributions for fly ashes
S. Ghosal, J.L. Ebert and S.A. Self (Stanford, CA, USA) 81

Laboratory techniques for evaluating ash agglomeration potential in petroleum coke fired circulating fluidized bed combustors
R.E. Conn (Livingston, NJ, USA) 95

Ash Formation and Behavior in Conventional Power Systems

Behavior of carboxyl-bound potassium during combustion of an ion-exchanged lignite
A.D. Shah, G.P. Huffman, F.E. Huggins, N. Shah (Lexington, KY, USA) and J.J. Helble (Andover, MA, USA) 105

Utilization of petroleum coke and petroleum coke/coal blends as a means of steam raising
R.W. Bryers (Livingston, NJ, USA) 121

The character of ash desposits and the thermal performance of furnaces
T.F. Wall, S.P. Bhattacharya (Callaghan, NSW, Australia), L.L. Baxter (Livemore, CA, USA), G. Richards and J.N. Harb (Provo, UT, USA) 143

Modelling of fouling and slagging in coal-fired utility boilers
T.A. Erickson, S.E. Allan, D.P. McCollor, J.P. Hurley (Grand Forks, ND, USA), S. Srinivasachar, S.G. Kang, J.E. Baker, M.E. Morgan, S.A. Johnson (Andover, MA, USA) and R. Borio (Windsor, CT, USA) 155

Ash Chemistry in Gasification Systems

High temperature desulfurization of synthesis gas with iron compounds
M.S. Najjar and D.Y. Jung (Beacon, NY, USA) 173

Iron sulfide deposition during coal gasification
D.D. Brooker (Beacon, NY, USA) and M.S. Oh (Seoul, South Korea) 181

Effect of crystalline phase formation on coal slag viscosity
M.S. Oh (Seoul, South Korea), D.D. Brooker, E.F. de Paz, J.J. Brady and T.R. Decker (Beacon, NY, USA) 191

Materials in Advanced Coal Conversion Systems
Coal-ash corrosion monolithic silicon carbide-based refractories
T.M. Strobel and J.P. Hurley (Grand Forks, ND, USA) 201
High temperature alkali corrosion of SiC and Si_3N_4
G.R. Pickrell, T. Sun and J.J. Brown, Jr. (Blacksburg, VA, USA) 213
Characterization of ash and char formations in advanced high temperature particulate filtration systems
M.A. Alvin (Pittsburgh, PA, USA) 237
